

Solar Energy in a Covid19 Era

Owoabasi Onuk
CEO, Cleanenergy

- Introduction
- Solar Energy Challenges and Opportunities in COVID 19 ERA
- Solar Energy Projects in Nigeria
- Research & University – Industry Collaborations
- Questions And Answer

INTRODUCTION

Never before in modern history has such a pandemic as COVID-19 disrupted economies globally; everything we hold dear has literally been shaken, and with the whole world shutting down for months, we have had to literally redefine what is really important and critical to our existence here on earth.

www.cleanergy.ng

INTRODUCTION

It is therefore imperative that we understand the Solar Energy Industry in the light of this New COVID-19 Era, so as to make strategic and informed decisions about the next Generation, and more so to forge strategic collaborations/engagements with the University so as to be strategically positioned for the next level of the Economy.

CHALLENGES & OPPORTUNITIES

Because with the whole COVID 19 experience we now had to practice social distancing and work from home, etc.

And since everything depends on Electricity, it now meant that Electricity was going to determine whether or not you'll function effectively.

Meetings such as this one we are having now became imperative and a basic way of life.

OPPORTUNITIES & CHALLENGES

ENERGY INDEPENDENCE

Solar Power gives you the opportunity to be energy independent.

HIGH DEMAND FOR ENERGY

Due to high level of remote work, Solar energy is now in high demand.

CAPACITY BUILDING

Hence the Industry Academia synergy that is being forged through this platform.

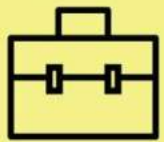

We are Cleanergy, and we are excited about our work everyday because each rising sun gives us the opportunity to solve the biggest problem in our Country - POWER!

Since 2008, we have been providing Solar Power solutions to homes, businesses, Institutions and large commercial buildings.

Today we provide the most reliable, efficient, robust and affordable Solar Power Systems in the Industry.

RESEARCH & UNIVERSITY-INDUSTRY COLLABORATION

There is a crucial need to develop capacity and build R&D centres as well as vocational centres across the country that can train and prepare Nigerians for the next level of energy independence
